Extra Credit

Track multiple pedestrians in a street video:
We implemented mulit-object tracking in street_tracking.py. The results were
mediocre; it picked up a lot of noise unfortunately.
To run the script for the two videos:
      python street_tracking.py ewap_dataset/seq_hotel/seq_hotel.avi
      python street_tracking.py ewap_dataset/seq_eth/seq_eth.avi
